Dümmen Orange and Schneider Youngplants to collaborate on rooting and sales of perennials

URC: Dümme Orange
RC: Schneider
RC Italy & Spain: Dümme Orange

Dümme Orange and Schneider Youngplants are set to start collaborating on the rooting and sales of perennials in Europe. Dümme Orange is relocating its perennial rooting operations from its site in Rheinberg, Germany, to Schneider's facility in Woudrichem in the Netherlands. Schneider will also handle sales transactions for products rooted by them. The collaboration will enable both partners to better meet the needs of the links in the supply chain, resulting in further growth in the perennials segment.

'This arrangement will give the quality and reliability of our products a boost,' says Tristian Bentvelsen, Managing Director Annuals, Perennials & Pot Plants EMEA at Dümme Orange.

'A focused team guarantees product quality,' says Schneider Product Manager Geert-Jan Aaldering. 'Added to this is our strong distribution network across more than 40 countries. This collaboration will create a broad sales network across Europe and will enable us to service the market better and more quickly. The combination of our existing range from seed and cuttings from Dümme Orange will offer the customer a total package for perennials.'

Schneider is a Dutch family business that was established in the mid-1960s, since when it has specialized in producing young plants, first in Ridderkerk and, since 2021, at its new site in Woudrichem. Schneider Youngplants' specialism is raising young plants from seed and cuttings in the annual, biennial, pot plant, perennial and cut flower segments. It has several highly experienced and committed young plant specialists on its staff, something that is also reflected in the professional support provided for growers. At Schneider, the four basic principles for professional collaboration are personal contact, craftsmanship, quality and transparency.
